GARDENSIDE LTD. PRODUCTS FEATURED IN HGTV AND APARTMENT THERAPY SOLUTIONS

Premier quality ♦ Superior craftsmanship ♦ Contemporary and classic designs

San Rafael, CA – July 22, 2009 – Gardenside Ltd., celebrating its 15th year anniversary, continues the tradition as the world's premier teak furniture company with recent accolades from both HGTV and Apartment Therapy.

Recently, HGTV selected Gardenside products as part of the overall solutions for two challenging landscape projects.

In “*Global Garden*”, the HGTV Landscape Smart team turned a long sloping yard into an exotic tropical escape. By incorporating the home owners’ travel memorabilia, as well as carefully chosen furniture and accents, they were able to turn an undesirable space into a functional and stunning outdoor retreat.

The beautiful lines of the Gardenside’s teak Provence bench were complimented by the use of recycled railroad ties, reed screens, and a hammock. This finished result now offers an extension of their living space while transporting them to a peaceful outdoor setting. Read the full article at:

In “*Patio Solution*”, host Michael Payne meets with home owners to design a patio space that will offer both rich wood features while still allowing an airy and open feel. After deciding on an open beamed trestle roof, it was time to pick out furniture. Gardenside’s teak Fairlight bench, Kentfield coffee table, Bistro chairs, and classic steamer chairs were selected. Tropical plants and a water fixture were added to complete the space. This resulted in a gorgeous outdoor room to be enjoyed for years to come. Go to <http://www.hgtv.com/home-improvement/patio-problem/index.html> for the full article.

Also in the news, after Gardenside returned from a successful show at the International Contemporary Furniture Fair® (ICFF) in New York, the new Lister® Purify teak line of bathtubs, sinks and vanities was selected by Apartment Therapy as Maxwell's Top Picks of the ICFF 2009.

This unique collection is the creation of renowned designer Tsuguji Sasaki, and achieves the pinnacle of serenity and beauty with its graceful lines and natural materials. Starting with an engineered block of teak, the line incorporates the appeal and endurance of teak wood with elements of steel for durability and functionality. The Purify Collection highlights the peaceful elements in nature, while comforting your body and soul.

Laurie Krashanoff, Director of Marketing, states "Gardenside is thrilled to have our products selected and featured in design solutions by these highly regarded organizations. Both HGTV and Apartment Therapy have helped home owners navigate the design world by searching out beautiful, stylish and affordable solutions for their home, gardens, and work spaces.
